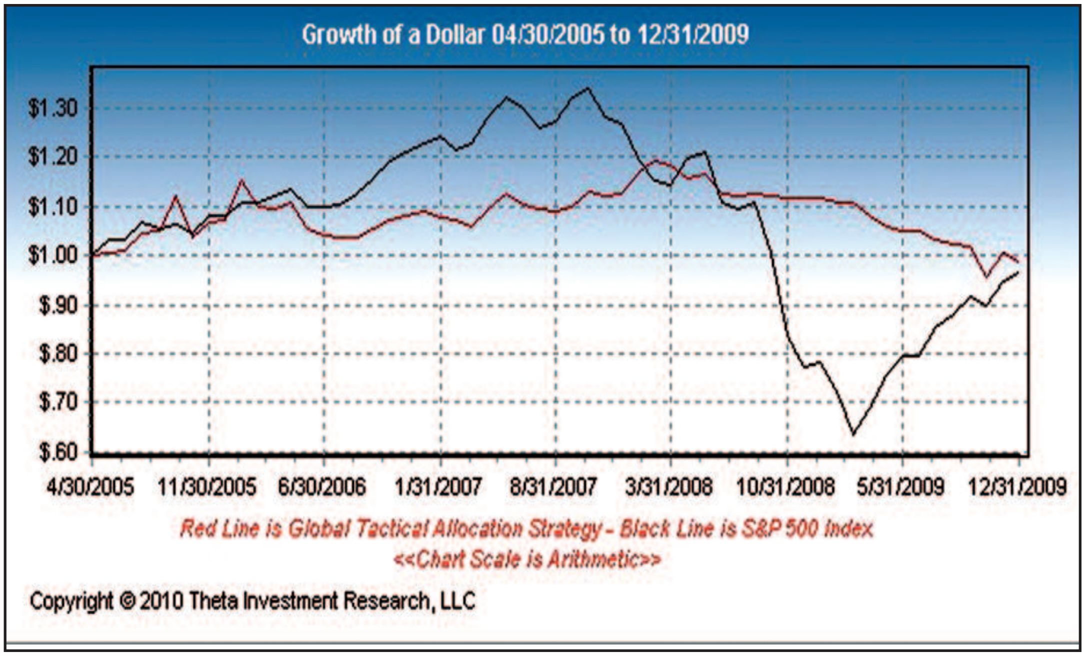
Global Tactical Allocation Strategy

Risk Level: Above Average
Return Objective: Aggressive Growth



STRATEGY DESCRIPTION

This strategy is designed to take advantage of diverse investment relationships that exist in the economy. The strategy invests in Exchange Traded Funds (ETFs) or mutual funds in six primary asset categories: domestic equities, international equities, domestic bonds, international bonds, real estate, and cash. The strategy can hold several positions at any given time. Assets may be moved to a money market fund when market conditions warrant such a position.

INVESTMENT OBJECTIVES

This investment strategy is designed for aggressive capital growth. Because this strategy seeks maximum returns, diversification may be limited and there is substantial risk. Because of these factors, this strategy is suitable only for aggressive investors who are prepared to withstand draw-downs in an effort to earn larger profits. Funds selected may have volatility equal to or greater than that of the S&P 500 index. Assets may also be moved to a money market fund if it appears that is the best procedure for avoiding capital loss during periods of high market risk. Investors must understand that high volatility and risk are inherent in strategies that seek a high return.

Important Investor Information:

• The results portrayed reflect the performance of an actual client account invested in SFG's Global Tacticial Allocation Strategy. For reasons including variances in account holdings, variances in the investment management fee incurred, market fluctuation, the date on which a client may have engaged SFG's investment management services, any account contributions or withdrawals, and the impact of taxes, the performance of a specific client's account may have varied substantially from the client's results presented herein.
• The performance results portrayed may not be indicative of future performance. Therefore, no current or prospective client should assume that future performance will be profitable or equal either to the client's portfolio performance results reflected above, nor the performance results for the comparative index benchmark.
• The performance results portrayed reflect the deduction of SFG's maximum advisory fee, which amounted to 2.5% per year. Different clients may be imposed the same or lower advisory fees depending on various factors, including account size.
• The performance results portrayed reflect the deduction of brokerage commissions and other expenses.
• The performance results do not include the impact of taxes, which, in taxable accounts, would generally have the impact of decreasing performance results.
• The historical performance results of the comparative index benchmark do not reflect the deduction of transaction and custodial charges, nor the deduction of an investment management fee, the incurrence of which would have the effect of decreasing the benchmark's historical performance results.
• Performance results were compiled by Theta Investment Research, llc., 518 Kimberton Road, #404, Phoenixville, PA 19460.
